VISION

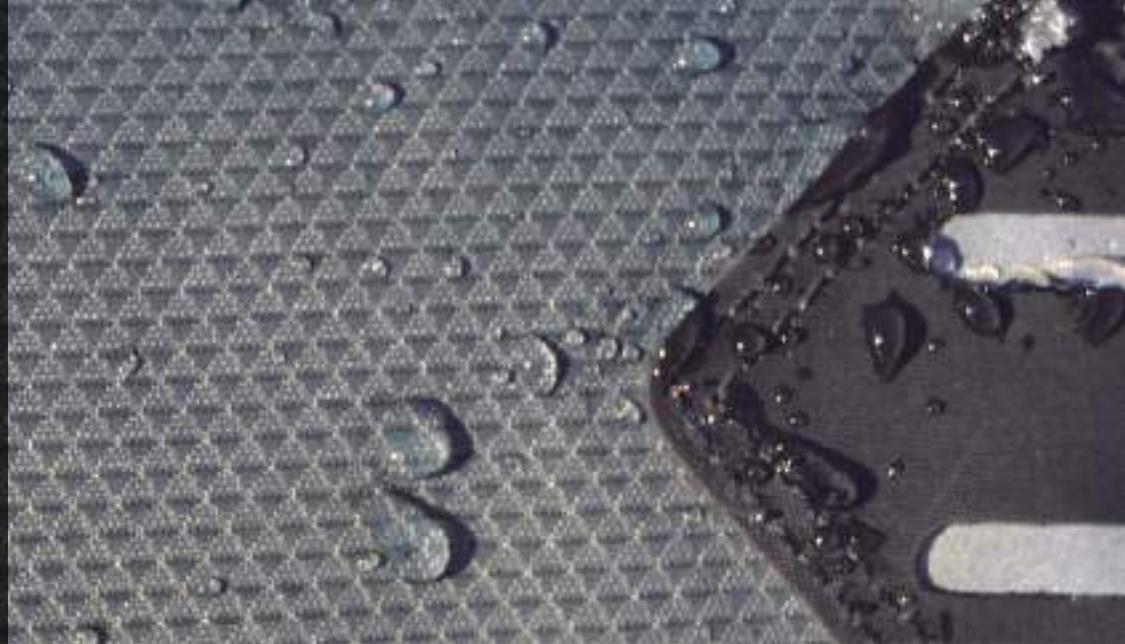

Geosmina is more than just a brand. Geosmina is a lifestyle. Geosmina is a journey of the senses. Yeah, really! The smell of the wet earth after rain, the feeling of the hot summer sun on your skin. Your burning lungs after a brutal climb. The feeling that the radiators of your engine are about to explode. We love the way it feels to be outside because outside is where real life takes place. Outside is where we feel real emotions. Outside is where we feel free and fulfilled.

So that you and your bike can embark on the next adventure, we have designed a perfect product for you! A product that is now improved and meets all your needs. A product that is useful, sustainable, and designed to make your bike rides more comfortable and safer. A product for all those who, like us, feel how travel fills us with life. A product for all those who see new horizons before their eyes and for those who can hear the longing whispers of the paths. On your journey, always be sure to treat nature with care and respect. If you take that to heart, you will see that the locals treat you with respect, not only because you honour them with your visit, but because you show that you not only know how to enjoy nature but also know how to treat it respectfully and sustainably.

TECHLONOLOGY

We have developed our new range of bags in such a way that not only the most adventurous and creative bike packers, have the best experience possible but also so that the needs of bikers, who have only just started with bike packing, are met completely. We have improved our bags without changing our vision of providing a product that is made of sustainable and eco-friendly materials. Our bags enable you to achieve your goals and at the same time offer you the opportunity to enjoy your travel experience to the fullest.

Eco-friendly

The composition of the materials of our Geosmina-Bags are PVC-free. Thanks to this fact and thanks to the special characteristics of our thermoplastic, our bags can be recycled and reused. In the manufacturing of all our Geosmina-Bags, environmental awareness is our motto.

Water repellent

Not 100% waterproof, but very water-resistant and splash-proof over a long period of time. Since moisture can enter through seams and walls in the long term. If you transport water-sensitive objects in one of our bags with this symbol, they should be protected additionally with waterproof bags to ensure their safety. Related Geosmina-Bags: LARGE FRAME BAG and SMALL FRAME BAG.

100% waterproof

Completely waterproof and dustproof. Luggage that you transport in bags with this symbol arrives at its destination completely dry. Related Geosmina-Bags: SADDLE BAG, LARGE TOP TUBE BAG, SMALL TOP TUBE BAG, HANDLEBAR BAG, LARGE SEAT BAG, SMALL SEAT BAG and CARGO CAGE BAG.

Nylon 210D with pyramid structure

Lightness, tear-resistance, and abrasion-resistance are just a few of the reasons why we decided to use nylon 210D. The material also impresses with its fast drying-time, extreme resistance at high temperatures and mold resistance. In addition, nylon 210D can withstand stretching and bending. All our Geosmina-Bags are made from this material.

Waterproof zippers

Waterproof zippers keep your bag completely dry. For example, they are indispensable in our top tube bags because they are directly hit by rain. All our zippers have a slider so that they can be easily opened and closed, even with winter gloves. Related Geosmina-Bags: LARGE TOP TUBE BAG and SMALL TOP TUBE BAG.

Zippers from YKK:

Our YKK plastic fasteners, with Y-shape, are just as robust as they are light. Each YKK zipper can withstand a weight of up to 40 kg. The flexible tabs are designed in such a way that they cannot break even when twisted. Thanks to their rounded corners, they can be opened and closed with ease. Related Geosmina-Bags: LARGE SEAT BAG, SMALL SEAT BAG, HANDLEBAR BAG and CARGO CAGE BAG.

PU coating

Our nylon 210D with pyramid structure is treated with polyurethane (PU). PU is a polymer that repels small amounts of water and thus delays penetration by moisture. It also makes the material wear-resistant, heat-resistant and cold-resistant. All our Geosmina-Bags go through this process.

TPU-Shield inside

Laminated on the inside with thermoplastic polyurethane (TPU). TPU makes our bags 100% waterproof. This material, which is also used in the aerospace industry, has a high elastic recovery and a high resistance to sudden temperature changes. It is also completely fireproof, antibacterial and resistant to oils and acids. Related Geosmina-Bags: SADDLE BAG, LARGE TOP TUBE BAG, SMALL TOP TUBE BAG, HANDLEBARBAG and CARGO CAGE BAG.

Thermosealing

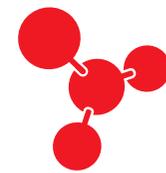

The process of thermosealing, which uses high frequencies to connect different nylon plates, completely shields your bag from water and dust. This process gives our Geosmina-Bags ideal ergonomics and aesthetics. Related Geosmina-Bags: SADDLE BAG, LARGE TOP TUBE BAG, SMALL TOP TUBE BAG, HANDLEBARBAG and CARGO CAGE BAG.

3M-Color

Logos and accents in reflective 3M-Color ensure that you are quickly visible to others when it's dark. Safety is our top priority. The cyclist should always be clearly visible to car drivers, even in poor lighting conditions, especially in the dark. The last thing we want for you on your bike ride is to worry because it's getting dark outside. That's why all of our Geosmina-Bags have reflective logos and accents.

SEAT BAGS

LONG TRAVEL & BIKEPACKING

SEAT BAG

GEOSMINA

Bikepacking large seat bag is made of 210D Nylon with an external Polyurethane (PU) treatment. Repels small amounts of water, delaying permeability and increasing the resistance of the material. To ensure total tightness, Geosmina's bikepacking large seat bag interior consists of a yellow Ripstop bag that also offers the necessary contrast to find your objects even though they are at the bottom. 100% waterproof. The rubberized bottom panel and Hypalon inserts strategically distributed, are details that denote the quality of this bag. The seatpost adjustment is carried out by means of two reinforced Velcro® straps. Reinforced straps that are fixed to the saddle. Perfect stability to the bag. New panel manufactured in Tarpaulin in the area of contact with the seat post. Greater resistance and greater grip against rolling. Geosmina offers this bag in two sizes: 10 and 15 liters.

SADDLE BAG

ROAD, MTB & DAILY

GEOSMINA 

Your small armored compartment of 0,6 liters of capacity. Perfect to take all your essentials on your outings, whether by mountain, road or city. Manufactured in 210D Nylon and with the same technology 100% watertight and 100% environmentally friendly as our Top Tube Bags. Our Bikepacking Saddle Tool bag has a rigid inner chassis that gives stability, shape and protection. The roll-up closure and by means of rubbers guarantees the total watertightness of the bag and allows you to carry your tools safe from any inclemency. In addition, a reflective Hypalon support allows you to adapt your taillight to be seen from behind. Adjustment by means of straps and Velcro.

VOLUME: 0,6 liters
DIMENSIONS: 14 * 8,5 * 6 cm
WEIGHT: 90 gr.
SKU: GE0110119

- External in pyramidal Nylon 210D waterproof with internal TPU laminate. Seams thermosealed.
- High resistance to abrasion and tearing.
- Simple opening with roll-up closure that guarantees watertightness. 100% waterproof.
- Environmentally friendly ECO material.
- Rigid interior chassis resistant to mud and splashes.
- Rubber closures.
- Hypalon rear panel with slots to allow the installation of light or auxiliary straps.
- Reflective details and logos.

FRAME BAGS

BIKEPACKING, ROAD & MTB

FRAME BAGS

GEOSMINA

New design and new shape that facilitates the use of two water bottles, as well as greater adaptability to a greater number of frames. Geosmina's bikepacking large frame bag offers you two completely different compartments. Inside we can find details such as dividers, pockets, hook for keys. Finished neon color, which undoubtedly is of great help for us, once again, to locate our gadgets quickly. This is the only Geosmina bag that is not 100% waterproof. It's resistant to water and splashes, as long as the conditions are not extreme. Once again the Polyurethane coating does its job of repelling water for a long period of time. However, one of the characteristics that we would like to highlight in this material is the speed with which it dries up,. Returns to its initial state in a few minutes. It adapts to the frame with Velcro straps and again we can find it in three different sizes: 5,5, 3,5 and 2,5 liters.

SPECIFICATIONS

- Waterproof 210D pyramid Nylon outershell with PU coating.
- Waterproof 210D Nylon inner with PU coating and yellow contrast.
- Double side pocket with YKK zipper with handle: makes it easy to use even with gloves.
- Inner pockets and hook for keys. Take your load neatly.
- 2 sets of Velcro straps reinforced with Hypalon and interchangeable to resist weight and adapt to all possible pipes (7 fixing points).
- Reflective logos.

NEW DESIGN

TOP TUBE BAGS

Bikepacking large top tube bag. A small, fully watertight and heat sealed trunk that includes a removable inner container that functions as a chassis, giving the bag strength and stability. Its interior can be divided into two spaces. Geosmina's bikepacking large top tube bag is the ideal bag for the Smartphone, energy bars or spare batteries. In a second and with only one hand you will have access to all your load. In addition, the brand has thought of all and incorporates 2 Velcro straps sets with different sizes. You can adapt the bag to both steel or titanium thin frames, as wide hydroformed or carbon tubes. Also available in two sizes: 1 and 0.6 liters capacity.

	SMALL BAG	LARGE BAG
VOLUME:	0,6 liters	1 liters
DIMENSIONS:	[h1/h2] - 21*5,5*10/5,5 cm	[h1/h2] - 26*5,5*10/5,5 cm
WEIGHT:	150 gr.	160 gr.
SKU:	GE0110418	GE0110518

SPECIFICATIONS

- Waterproof 210D pyramid Nylon outershell with PU coating.
- 100% waterproof inner laminated TPU.
- Sealed zipper with handle: Impermeability warranty and easy to use even with gloves.
- ECO environment materials. PVC free and 100% recyclable.
- 2 reinforced Velcro straps set. Can be adapted for different tubes sizes.
- Removable 210D Ripstop Nylon inner cage with waterproof PU coating and yellow contrast.
- Inner spacer: allows a double compartment.
- Reflective logos.

HANDLEBAR BAG

LONG TRAVEL & BIKEPACKING

HANDLEBAR BAG

GEOSMINA 

Bikepacking handlebar bag 100% waterproof and sealed bag. This 10 liters capacity and simplicity bikepacking handlebar bag, its best argument. It lacks additional supports without affecting stability. This allows you to disassemble in a few seconds and adapt perfectly to any handlebar, whatever the discipline. Bag access is on both sides and its closure system, through the more than established and contrasted roll-up closure. The bag incorporates Hypalon front supports so you can put your front led light or attach different objects. Two straps that come incorporated into this bag. We have been surprised by its lightness, which means that even at full load, it does not affect the stability of the steering.

VOLUME: 10 liters
DIMENSIONS: 63 * 27 * 27 cm
WEIGHT: 290 gr.
MAX. LOAD RECOMMENDED: 4 kg.
SKU: GEO110318

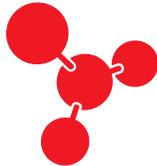

SPECIFICATIONS

- Waterproof 210D pyramid Nylon outershell with PU coating.
- 100% waterproof TPU inner laminated.
- High resistance to abrasion and tearing.
- Double side roll down closure for tightness guarantees.
- ECO environment material. Free of PVC and 100% recyclable.
- Fastening straps, reinforced with Hypalon and integrated metal buckles.
- Reinforced back panel to resist abrasion from bars and cable runs.
- Front Hypalon sections which can mount LED, extra or be used to secure heavy loads with extra straps.
- Reflective logo.

FORK CARGO BAGS

TRAVEL, MTB & BIKEPACKING

FORK CARGO BAGS

GEOSMINA

Cargo Cage fork bag our spoiled girl. One of our most useful and polyvalent lightweight cycling bags. Its composite cage can be fixed to your fork with clamps or, if it's allowed, with screws. Our Cargo Cage fork bag can also be fixed on threads to carry bottles in your frame. The 5 liter bag with internal TPU laminated. Completely waterproof and will ensure that your stuff always travels isolated from moisture and dust. The cage and the bag make a great team together, but separately they can be very useful for you as well. You can use the bag for transporting or even take water. It can be your travel shower. Cage allows you to transport large bottles of water or whatever you improvise along the way. Valid for rigid and suspension forks.

CAGE:

DIMENSIONS: 7,5 * 12,5 * 21,5 cm

WEIGHT: 290 gr.

MAX. LOAD RECOMMENDED: 3 kg

NOTE: THIS REFERENCE ONLY INCLUDES ONE BAG AND A ONE CAGE WITH ALL ITS ACCESSORIES

BAG:

VOLUME: 4 liters

DIMENSIONS: 12 * 12 * 38 cm

WEIGHT: 310 gr. (cage included)

SKU: GEO110818

NOTE: THIS REFERENCE ONLY INCLUDES ONE BAG AND A ONE CAGE WITH ALL ITS ACCESSORIES

WE ARE TRAVELLERS

We travel with passion. We love to discover new places and get to know new people and cultures. We are adventurers, who like to get lost in the vast expanses of the world. We love beautiful landscapes and the sound of the rivers winding down the mountains. We like to just sit quietly and contemplate the beauty of our surroundings and to let our thoughts wander. We love the smell of fresh rain but most of all we love the smell of traveling.

Geosmina was born out of our passion for cycle tourism and our respect for the environment. From the beginning of the company, it was our goal to offer a product that is made of materials that are sustainable, eco-friendly, robust and of high quality, so that our bags can accompany you on your trips safely, even after many kilometers. A lot of time has passed since our early days and our first journeys that filled us with joy. Even after many years, our passion for traveling is stronger than ever before because the endless wanderlust in our hearts will always move us to visit distant places and enjoy life to the fullest.

Don't wait any longer. Plan your next journey and enjoy your bikepacking trip with Geosmina. The adventure awaits you!
